

Backed Bench Plan

MATERIALS AND TOOLS:

- (7) 2x4" x 8' pieces of douglas fir lumber
- (75) 2 1/2" decking screws, saw, drill, speed square, tape measure
- * All angled cuts are 15 degrees (use speed square or measure 15/16" from edge)

BUILD INSTRUCTIONS:

- Start by assembling the legs, with two screws per connection
- Make sure all edges are flush when connecting pieces
- Attach the back support pieces so that the two sides mirror each other
- Connect the horizontal support piece, making sure that it goes in square to both sides
- Attach the seat pieces and then the back pieces, leaving an even gap between each piece
